

## **Çedilla on the Road With REgenerist**

*Çedilla showcase business software for the Waste Management Industry in a recent series of Roadshow Events*

**27<sup>th</sup> April 2004:** Çedilla Systems Ltd, one of UK's top three Microsoft certified Business Partners specialising in the Navision software range, have completed a hugely successful series of roadshow events showcasing the REgenerist product for the waste management industry.

Based in Manchester, Çedilla are UK specialists of Microsoft Business Solutions software for the waste management industry. The roadshow series took in Reading and Manchester, and provided delegates with the opportunity to view REgenerist first hand.

REgenerist is an ERP (Enterprise Resource Planning) system for companies engaged in all areas of the waste management process (from municipal waste collections to specialist waste recycling). The solution is designed to help companies manage their accounts, contracts, fleet, human-resources, equipment, waste tracking and waste analysis from within one single integrated solution, and is widely regarded as the most technologically-advanced packaged solution available to the industry. REgenerist is already used by over 40 waste management companies through Europe, and was launched into the UK by Çedilla in June of last year.

"We wanted to give potential users of the system the opportunity to see REgenerist used during specific business processes", commented Jason Fazackerley, Sales & Marketing Director at Cedilla Systems. "The Roadshows showed the specific benefits of using REgenerist, such as faster order-processing, more accurate invoicing and more efficient scheduling of waste collections and disposals".

Over 50 delegates attended the events, held at Microsoft's headquarters in Reading and The Lowry in Manchester. Topics covered during the day included the Benefits of ERP to the Waste Management Industry, Fleet Management, Financial Management and Package Tracking. Attendees were also given a comprehensive overview of the REgenerist software and a chance to talk to consultants about their individual requirements and how REgenerist can maximise their specific business processes.

"Çedilla are committed to bringing the benefits of the latest IT technologies to specific industries and vertical markets" continued Fazackerley. "We will continue to invest in events such as

Roadshows to take our products to the market, and make companies aware of the benefits of using Microsoft Business Solutions software in their businesses”.
